

LEARNING INTERVENTION PROGRAMS

STUDENTS ACTIVATE SUCCESS WITH "LEARNING LABS"

"Learning Labs" draws upon state-of-the-art learning sciences, research principles, practices, and years of experience to teach each program type to young learners based upon our systematic analysis.

The Lab learning programs are comprised of the most effective, evidence-based practices within instructional methodology. The programs are especially crafted to meet the needs of "at risk" students or students with learning disabilities. The programs design and delivery allows for recovery and learning in a relatively short period of time, therefore, assuring that the academic gaps will be closed in due time.

There are currently four Learning Lab programs:

- Reading Lab
- Writing Lab
- Math Lab
- Language Lab

The Lab series have been the focus of several major research projects and numerous independent studies all printed in related peer-reviewed publications.
